County

FOUND TWO MONUMENTS FOR THE SOUTH QUARTER CORNER OF SECTION 17. I found a rebar with aluminum monument set by Interstate Engineering and described in Corner Recordation (Bk 1, Pg 19) filed July 30, 1982. Interstate Engineering single proportioned and set their monument equal distance between 2 section corner monuments they had previously set. This is the correct procedure for re-establishing a quarter corner. However since I did not accept either position for the 2 section corner monuments they used, I could not accept their position for the quarter corner. The other monument was a 3/4" iron rod similar to those used by the highway department survey crews. The highway plans for Montana State Highway No. 12 dated July 26, 1935 show a Quarter Corner as being found. The plans for the overpass change show a Quarter Corner as being found and a notation stating "1518+80.6 $\frac{1}{4}$ cor. in pl. rt. to be removed & reset by State forces". I telephoned Montana State Highway Department and they could find no notes as to the idenity of the monument or if it was a found monument or a re-established monument. I spoke with Richard Guenzi concerning the monument and he informed me that it had been an accepted monument by previous surveyors (public & private). I accepted the 3/4" iron rod as the correct position for the South Quarter Corner of Section 17.

The two monuments found are referenced to each other as shown below. The monument accepted is referenced to surrounding subdivision corners according to the sketch on the reverse side.
