INSTRUCTIONS

 1. O1
 .1 and/or subsequent record used to evaluate the corner position.

 2. Description of evidence found, note discrepancies in the record, state method of establishing lost or obliterated

corners.

corners.
Description of monument and accessories set to perpetuate the corner position.
Sketch or corner, show all pertinent data which can best be shown in a sketch example, corner marking, topography ties, position of accessories, etc.
Certification must be signed and sealed by Registered Land Surveyor in State of Montana.
Fill in Cross Index & Seciton Diagram at bottom of sheet.

CERTIFIED CORNER RECORDATION

Corner Mortheast Sec. Cor Sec. 26 Valley 29N 39E P.M.M._ County

<u>GLO RECORD</u>: 80.00 ch. Set a sandstone $18 \times 10 \times 10$ ins. 12 ins. in the ground for cor. to secs. 23,24,25 and 26, marked with 2 notches on S and 1 notch on E edges. Dug pits $18 \times 18 \times 12$ ins. in each sec. $5\frac{1}{2}$ ft dist. and raised a mound of earth 2ft high $4\frac{1}{2}$ ft base alongside.

EVIDENCE FOUND:

None of the above, as the corner falls in the approximate centerline of the county road. County records do not afford a tie for the corner either. Established the corner by reference to the found original stone corner 5280.20 ft to the North, and the use lines, fences, county road to the east, and ancient fence line to the West.

Set a $\frac{1}{2}$ " x 24" long steel re-bar 3" below the surface of the road with the plastic identification cap 889ES DCB. at the cor point.
